

# Targets span our ecosystem and are designed to respect natural boundaries of planet and strengthen communities

## Pillar

## Targets or Actions for 2022

### Positive Value Chain

#### Circular Plastics Economy:

- Extend rPET launch to full PET portfolio in South Africa
- SA EPR collection & recycling: 58% Flexibles; 60% - PET
- 650 tons virgin PET reduction in SSA

#### Net Zero Emissions:

- Achieve 8% Renewable Electricity through Power Purchase Agreements and onsite Solar.
- 5% reduction in Energy usage in manufacturing

#### Ensure we have net water positive impact:

- 1.2 Billion litres replenishment (71% of SSA High Water Risk water consumption)
- Achieve 41% reduction in Ops water usage (vs. 2015)

#### Zero waste to landfill

- Zero waste to landfill readiness for 6 sites

Continue to adopt the Alliance for Water Stewardship Standard in high-water-risk manufacturing areas, by 2025, as a vehicle for water advocacy

### Positive Agriculture

Best irrigation practice implementation on 65% of High-Water Risk cultivated land.

### Positive Choices

#### Evolve Product Portfolio

- **71% sodium** reduction compliance; **88% Saturated Fat** compliance and **82% sugar reduction** compliance
